

SMALL OFFICE COMPUTER SUPPORT

SOCS: Small Office Computer Support

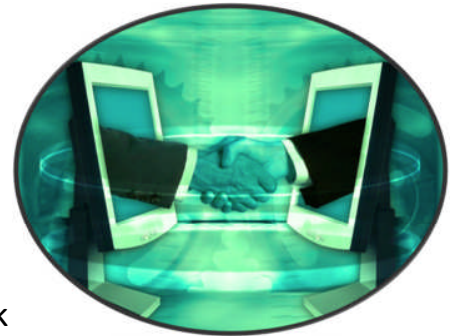

Not everyone who uses a computer has the time or the budget for part-time or full-time IT support to solve problems. CHESS has been providing onsite computer hardware and software support for over 20 years.

Our technicians can come to you and provide your business with an array of helpful services including:

- Proactive Computer Tech
- Onsite and Remote Support
- Monthly check-ups

These three components give you...

1. Free evaluation of your office computers and network
2. Protection to prevent loss of important files/documents
3. Help with keeping your computers up-to-date.
4. Removal of viruses and spyware
5. Face-to-face help and advice
6. Scheduled visits to keep your hardware and software up-to-date and working at maximum efficiency
7. Remote access takes less time than someone driving to your place of business to fix the problem at hand

SOCS by CHESS gives you all of the above while also giving you options to customize your SOCS to fit the needs of your business.
